

Red Base Rainforest Display Board

Red Base have been busy creating their pupil crafted rainforest display board. Each student created an individual piece of art for this beautiful rainforest display, which includes a waterfall, a sloth, a snake, a tree, a monkey, a jaguar and a parrot. The board looks better than imagined. Well done to everyone in Red Base!

Live Music Sessions

Soundabout (a charity of music practitioners) have fun and interactive music sessions for people of all ages with PMLD and SLD. Music sessions are held every Tuesday and Saturday at 2pm, live on the Soundabout Facebook Page. The Story Massage Programme combines positive touch with storytelling. It is a fully inclusive

programme suitable for all ages and abilities. They run a live session on their Facebook page on Tuesdays at 2pm. This is ideal for students, especially those currently learning from home. For more information go to www.soundabout.org.uk

Elderflower Cordial

Indigo class recently made elderflower cordial. Students followed a recipe to make the light fragrant and refreshing summertime drink. Pictured is Indigo pupil Teri enjoying the process of making the cordial.

Ice-cream/lollies

As an end of term treat, we have arranged for Mr Whippy – Ice-cream van to visit the school site to serve ice-creams and lollies to students on Friday 17th July. We would like to keep this as a surprise and are hoping the warm weather continues for the children to enjoy their end of term treat. Willoughby will fund this, so there is no need for parents/carers to send money in with your child. Please do let us know of any specific dietary requirements.

New School Lawnmower

Last Friday we had a lawnmower delivered which was bought from Robert H Crawford & Son of Firthville, near Boston. Pictured are Site Manager Dave Conlon and Cliff Goldsmith who works for Crawford's. Cliff was instrumental in helping us choose the right machine and his help was greatly appreciated.

LPCF Survey Results

The Lincolnshire Parent Carer survey and SENCo survey have now been published and are on the library page of the following website. Please click on the link https://www.lincspcf.org.uk/P_Info_Library.php to access. LPCF would like to thank everyone who contributed towards the findings. Please note these reports will be circulated to the DfE, Local Authority, Health, Service providers, Education settings, Parents, Carers and professionals and are available to the public on the library page of the LPCF website. If you have any feedback on the findings or otherwise please do not hesitate to contact LPCF.

Dead Sea Experiment by Jade Class

Jade Class have investigated why people float in the Dead Sea. Students used plain water and then mixed salt water and sugar water in bowls. Students were eager to see what would happen to light objects when placed into the water. The results were not exactly what students had predicted they would be! Pictured below are Amy and James preparing for the class-based experiment.

Green Fingers in Red Base

Red Base are growing their own tomatoes. Each pupil has their own plant to care for and they take observations and measurements every Wednesday. In literacy pupils write sentences about the increase in height, number of leaves and flowers. Nathaniel recently found the very first tomato on his plant, generating much excitement among the class. Students have really enjoyed learning about plants and have also planted geraniums, sunflowers and horse chestnut trees.

Sport Relief Update

Thank you to everyone who donated to this cause. We can confirm that £105.00 was raised and paid into the Sport Relief Fund. There was a delay paying the funds in due to the current situation, however we would like to thank you again for your generosity.
